

Objects visible for March 2024 at 11:30am

Astrophotography

We plan to photograph objects from the following list.

The number of things we see depends on how clear the sky is.

If the session is brought forward to 10:30pm, the list below will be different.

17 Inch Telescope:

Planets: nil

Nebulae Tarantula Nebula, Eta Carina Nebula

Globular Clusters: 47 Omega Centauri.

Open Clusters: Jewel Box, Gem Cluster

Galaxies: Centaurus A, Sombrero Galaxy, Southern Pinwheel Galaxy.

Planetary Nebulae: Ghost of Jupiter

3 Inch Telescope:

Tarantula Nebula Region

Small Magellanic Cloud

Eta Carina Nebula

Leo Triplet of galaxies

Virgo supercluster of galaxies

Takahashi FSQ106edx4 Telescope using our CCD Camera

Eta Carina Region. You will need to bring a usb stick for the images.
